AWS Certified Developer – Associate

James Lewis

Full-stack Ruby on Rails/JavaScript Developer
Roosevelt

Summary

I am a seasoned and passionate full-stack web developer with 9+ years of experience, including 4 years of a senior web developer at DOOR3, one of New York's leading IT companies. In the past, I have designed and programmed websites for internal and external use, along with JavaScript-based responsive/dynamic web applications, using React, Vue, Angular, Node, Express, and various database. I have developed many Ruby 2.x | 3.x / Ruby on Rails 5.x | 6.x based websites, providing support with content-based requests, custom forms, back-end (Ruby on Rails, Hanami, Sinatra, Grape), and front-end (React, Angular, Vue, jQuery, TailwindCSS).

- Loving the thrill of creating something entirely new, having many ideas and the perfect outlet to express them.
- Passionate about transforming my ideas into real-world programs.
- Passionate in building products that are high-quality, scalable & user-friendly.
- Expertise in a variety of disciplines, valuable insights into the product life cycle.
- Challenged assumptions, took a holistic viewpoint, and always put the client's needs at the top of the priority list.

Experience

Bentley & Hoke

Software Engineering (Ruby on Rails, React, Angular, Node)

January 2019 - December 2021 (3 years)

Syracuse, NY
